

INCREASED OOH ALLOCATION BOOSTS MEDIA PLAN SALES ROI AT NO ADDITIONAL COST

Benchmarking's analysis of incremental adjustments in media plans found that by simply reallocating a few points of budget share from overspent media to OOH, Automotive, CPG Food, and Retail grocery brands could significantly increase return on ad spend (ROAS), and boost brand metric scores, at no additional cost.

Key Findings

OOH delivers strong ROAS that improves total media mix ROAS

OOH drives improved brand perceptions throughout the marketing funnel

Current media mixes are not optimized because OOH is not planned at sufficient allocations

Underfunding OOH prevents total plan optimization due to over allocation to other channels

Increases of even a few points of share to OOH achieves the vast majority of total plan optimization

ROAS Impact of Boosting OOH Media Plan Share

Automotive

OOH share shift from 1% to 2%

75%

capture of total ROAS optimization

\$52M

ROAS gain generated

CPG Food

OOH share shift from 1% to 6%

70%

capture of total ROAS optimization

\$2.4M

ROAS gain generated

Retail Grocery

OOH share shift from 8% to 14%

61%

capture of total ROAS optimization

\$16M

ROAS gain generated

Benchmarking Recommendations

- Use the incremental increase findings to guide stepped adjustments in OOH spending levels to move toward total media plan optimization.
- A "test and learn" best practice advocates for incremental spend shifts by reallocating from channels identified as over-spent, using multiple evaluation and reporting methods.
